Profile

Highly motivated and results-driven **React.js** and **Node.js developer** in developing efficient web applications. Proficient and strong understanding in creating server-side applications and client-side applications using **React.js, Node.js, Express.js, Javascript, Sqlite, CSS**.

Projects

2023

Nxt Trendz App [🔗](#)

Nxt Trendz is an **E-Commerce** application like Flipkart, Amazon where user can login and see the list of products with search, filters, sort by features etc... The functionality of this app is when an unauthenticated user tries to access the **Home Route, Products Route or Cart Route**, then the page will be navigated to the Login Route using the protected route, when an authenticated user tries to access the Home Route, Products Route or Cart Route, then the page will be navigated to the respective route using the protected route

- used **js-cookie** third-party package for user Authentication and Authorization.
- used **React Router** for navigating through different routes.
- used third-party packages like **React Loader, React Icons** etc for easy integration and better Error Handling

Technologies : React.js, CSS mediaqueries, jsx

Demo: <https://nxtz.ccbp.tech>

2022

Todo-list [🔗](#)

Developed persistent todo application with **CRUD** operations to track list of tasks. This app helps users to track the day to day tasks. Users can create, edit, track the status of each todo item and able to persist them over page reloads.

- Displayed list of todos with **HTML** list elements, styled todo list using **CSS, Bootstrap**
- Implemented todo crud operations by using **JavaScript event listeners** and updated UI dynamically by using **JavaScript DOM operations**.
- Used **Arrays, Objects** and their methods during todolist **CRUD** Operations, Persisted todo list state on page reloads using **local storage methods**.

Technologies used: HTML, CSS, JS, Bootstrap
